EXPERIENCE

Accessibility Auditor

QuaverEd | *Nashville, TN* Oct 2026 - Present

- Audit curricula PDFs, videos, and digital learning content against WCAG 2.2 AA, Section 508, and ADA standards; evaluate and remediate PDFs using industry-standard tools and techniques.
- Verify and improve video and multimedia accessibility, including closed captions, audio descriptions, and transcripts; conduct manual testing of web products with screen readers (NVDA, JAWS, VoiceOver) and other assistive technologies.
- Partner with web developers, designers, and content creators to remediate accessibility issues, reviewing code-level HTML/ARIA and visual design elements, and contribute to internal accessibility standards and checklists.

Web Accessibility Tester (Intern)

Miami University, IT Services | *Oxford, OH* Apr 2024 - May 2026

- Audited hundreds of digital platforms, websites, and content pieces against WCAG 2.1 A/AA with manual testing plus automated scanners; enterprise platforms tested include Workday, Zoom, Slack, Webex, and Handshake.
- Tested across macOS, Windows, iOS, and Android using NVDA, JAWS, keyboard-only navigation, Axe DevTools, and browser developer tools to catch issues automated scans miss.
- Inspected underlying HTML, CSS, ARIA, and page structure to trace each defect to its root cause and produced structured, actionable defect reports for developers and IT.
- Trained and onboarded new hires on accessibility testing methodology and partnered with developers and IT leadership to drive fixes to closure.

EDUCATION

Miami University, Oxford, OH

Bachelor of Science in Computer Science | Minor: Mathematics | May 2026

GPA: 3.83, Magna Cum Laude | President's List and Dean's List

Relevant Coursework: Web Application Programming, Software Engineering, Database Systems, Data Structures & Algorithms, Technology Ethics & Global Society, Technical Writing, Comparative Programming Languages

SKILLS

Accessibility Testing: WCAG 2.1 A/AA, manual and automated auditing, screen reader testing (NVDA, JAWS, VoiceOver), keyboard navigation, focus management, color and contrast checks, cross-platform testing (macOS, Windows, iOS, Android), root-cause analysis

Web and Code: HTML, CSS, ARIA, semantic markup, DOM inspection, JavaScript, TypeScript, React, responsive design; Python, Java, C++, PHP, Node.js, SQL, Bash

Tools: Axe DevTools, Access Assistant, browser developer tools, Playwright, Docker, GCP, VS Code, Git/GitHub/GitLab, Trello, Kaltura

Documentation and QA: structured defect reporting, remediation guidance, accessible documents (Word, PDF, slides, forms, video), test methodology, training and onboarding, technical writing

PROJECTS

AI Tutor: Full-Stack RAG Platform with LLM Inference Backend (Primary Developer, Deployed)

Tech: React, Flask/Python, MySQL, SQLAlchemy, Docker, CI/CD, GitLab, REST APIs, RAG, CAS SSO, pytest

Designed and shipped a deployed, course-aware AI tutoring platform end to end: Flask/Python REST APIs, React front

end, MySQL/SQLAlchemy models, retrieval-augmented generation with guardrails and evaluation, CAS single sign-on with role-based access, and a GitLab CI/CD pipeline with a pytest suite.

AI Job Application Agent

Tech: Python, Playwright, LLM Agents

Built an autonomous job-application agent with a perception-reasoning-memory-execution-orchestration architecture: deterministic job scoring, Playwright browser automation with dry-run autofill for Greenhouse/Lever forms, grounded per-job answers, and a guarded-submission policy that blocks on unresolved sensitive fields.

Syllabus RAG Chatbot

Tech: Python, ChromaDB, RAG, Streamlit, Docker

Built source-grounded document Q&A over syllabus and policy PDFs/DOCX: local ChromaDB vector store, hybrid dense + keyword retrieval with reranking, citation-enforced answers, and a Precision@K / Recall@K evaluation harness, containerized with Docker.

Home Nexus: Real Estate Web Application (Team Lead, 4 engineers)

Tech: Flask, SQLAlchemy, HTML/CSS/JavaScript, full-stack

Led a four-person team building a Flask/SQLAlchemy property-listings platform with user authentication, multi-criteria and address-based search, and a favorites system; coordinated planning, task division, and delivery.

The ALT Space: Full-Stack Ticketing and Event Platform

Tech: Node.js, Express.js, EJS, SQLite, HTML/CSS/JavaScript

Built event creation, ticket booking, check-ins, feedback collection, and an analytics dashboard with CSV export on a Node/Express stack.

Model Evaluation and Benchmarking Pipeline

Tech: Python, scikit-learn, XGBoost, pandas, NumPy

Built an automated pipeline benchmarking 7 model architectures (~94% accuracy) with hyperparameter tuning and k-fold cross-validation.

CERTIFICATIONS

- Testing with Screen Readers: A User-Flow Case Study, Level Access, 2024
- Creating Accessible Documents Using Word, Level Access, 2024
- Technology, Ethics, and Global Society, Miami University, 2025
